QUESTION 4

Are there any factors preventing or restricting use of this

4a. Please choose from the following options and enter the appropriate letter. You may enter more than one letter per

PROW.

									[PARISH COUNCIL PROPOSED RANK = A] Heavily used route to school and pre-
									school from east of village. At The Causeway end, the pavement is used by parents
									with buggies travelling in both directions. The hedge of adjacent house on The
									Causeway grows across the pavement, pushing pedestrians into the path of
Footpath	Burwell	East Cambr 20	35	С	burwellpc@burwellparishcouncil.gov.ul	H Y		V	vehicles entering the school grounds.
									[PARISH COUNCIL PROPOSED RANK = A] Popular route for access to Ash Grove,
									the Day Centre, Co-op, school, library etc. Favoured by users of mobility scooters.
Footpath	Burwell	East Cambr 21	35	С	burwellpc@burwellparishcouncil.gov.ul	H Y			Vehicles freely use the footpath area, which makes it unsafe.
									[PARISH COUNCIL PROPOSED RANK = A] Popular route for access to Ash Grove,
									the Day Centre, Co-op, school, library etc. Favoured by users of mobility scooters.
Footpath	Burwell	East Cambr 22	35	С	burwellpc@burwellparishcouncil.gov.ul	Н		S	Tree roots beneath tarmac are a regular problem near Poplars Close.

Burwell Parish Council Energy Sub-Group

Minutes of 16 July 2025 Meeting, JRR 19:30

Present

Richard Jenkins Ian Woodroofe

Lea Dodds (Chair and Minutes)

Apologies: Paul Webb

1) **GMH**

ASHP Controls.

- a) Power supply to controller in main hall Richard's notes on meeting held with Jeremy Sharman 2nd July are copied at the end of these minutes. Ian is chasing responses on the various issues.
- b) Simple guide required after we have fully understood the system.

Replacing faulty ASHP Adam Kerrison emailed us on 16/5 saying:

"I have emailed Mitsubishi back and will let you know when one there engineers can attend. I have also gone onto their website to look at the fault code on P8 Fault. Please see link below and extract info" lan requested an update – Adam sent Mitsubishi a reminder on 16 July.

<u>Maintenance contract</u> After the repair, we will need to recommend a provider for maintenance support. Lea to liaise with Katherine on this.

<u>Destratification fans</u> Raise with energy auditor (later in year)

<u>Energy monitor readings</u> Richard says the data looks believable (within 10%), but to be sure we need to match it to one more invoice.

2) Energy audits

Audit now booked for 12.00 on 30th July. Lea to attend, Debbie available to answer questions. Plasterer has said the intense heat in the loft above Hall One may be worsening the cracking. Lea to ask energy auditor about fitting space blanket onto rafters.

3) Mandeville

NZV project On hold until energy audit completed.

<u>LED proposal</u> Fittings have arrived. Richard to liaise with office on installation date. Latest plasterer to offer an opinion has said he can repair the ceiling cracks <u>after</u> the new lights are fitted, if we wish.

<u>Energy supplier</u> Council has agreed to change electricity supplier to Octopus 12 month tariff. Uses 100% renewables and has a better tariff for export rates.

AOBs and date of next meeting

18 August – next meeting

Schedule for Q2 - Q4, 2025

July/Aug MH energy audit. Then respecify work + requoting if necessary.

GMH - fix most urgent issues with heating

Change energy suppliers at MH

July-Sep Recommendation and approval of contractor for MH project

Sep-Nov MH Phase 1, co-ordination and delivery

GMH - energy audit, then get quotes for necessary work

Begin search for energy provider to replace Engie

Notes on meeting held with Jeremy Sharman 2nd July, GMH.

- The ASHP System should ideally be setup with 3no. Basic Settings:
 - o Summer Mode Outside Temperature over 16°C = System is OFF
 - Spring/Autumn/Night Mode Outside Temperature between 5°C and 16°C =
 System Heating Buffer Tank to 35°C and Weather compensated heating output pumped to the building to achieve 21°C
 - Winter Mode Outside Temperature below 5°C = System Heating Buffer Tank to 45°C and full heating output pumped to the building to achieve 21°C
- Ian to contact Shane at Mitsubishi, to ask:
 - Does Master Controller in building control the ASHP's or the Secondary Pump(s) or both?
 - How to adjust the settings on the Master Controller to reflect the above Basic Settings.
 - In addition to the Temperature controlled Summer Mode, can the System be setup to turn off from May or June to September?
- We will leave the Main Controller where it is located, unless issues develop with areas away from the Main Hall not heating adequately.
- The Boost Controller in the Main Hall will be investigated for correct programming and functionality once the Master Controller has been setup correctly and has been running for a while.
 - At present, the fans in the wall units run continuously irrespective of the Controller Temperature setting. Debbie is currently controlling the Fans by closing the vents. There are heating and cooling programs, but I was unable to access them today.
 - We will need a programming guide for this Controller?
 - We want to introduce a night setback setting of 18°C for the Main Hall to save energy.
- Debbie has been asked to open the 2no. small hi-level electric windows on hot days and close them when she locks up. This should reduce the development of stifling heat when the Main Hall is in use on hot days/evenings.

Minutes of 23 June 2025 Meeting, JRR 19:30

1) **GMH**

ASHP Controls. Next actions?

- a) Controls etcl Meeting arranged with Jeremy Sharman (JS) for 5pm, 2nd July at GMH. Will cover design concept, implementation & commissioning documents. Also, ask how the controller, vents and fans interact.
 - Richard has now converted the controller (near servery) to be permanently powered.
- b) Simple guide JS has agreed to discuss producing a simple guide to the system controls and to consider whether we should use set-back temperatures.

Replacing faulty ASHP Adam Kerrison emailed us on 16/5 saying: "I have emailed Mitsubishi back and will let you know when one there engineers can attend. I have also gone onto their website to look at the fault code on P8 Fault. Please see link below and extract info"

lan will contact him to check on progress.

<u>Maintenance contract</u> After the repair, we will need to recommend a provider for maintenance support, and make a decision about UV lamps. We should again ask Sothams for a price – partly in order to understand the proposed work schedule.

<< Later note: we have found that there are no UV lamps are installed in the convector units).

<u>Destratification fans</u> JS believes they were avoided due to cost, and potential issues with integrating into the building structure internally, and aesthetics. Discuss on 2nd July.

<u>Installing energy monitors</u> Now done. We need an energy bill to compare the readings.

2) Energy audits

We need to chase Oli for a date. He will require energy usage (LD to provide) and occupancy (Sarah to provide).

LD has booked a place at the public buildings energy efficiency workshop.

3) Mandeville

NZV project To be reviewed after energy audit completed.

LED fitting Lights etc on order.

<u>Energy supplier</u> We are out of contract with Corona. Katherine now has 3 quotes and we are likely to propose Octopus as the new supplier.

AOBs and date of next meeting

Next meeting Mon 14th July

Schedule for Q2 - Q4, 2025

July/Aug MH energy audit. Then respecify work + requoting if necessary.

GMH - fix most urgent issues with heating

Change energy suppliers at MH

July-Sep Recommendation and approval of contractor for MH project

Sep-Nov MH Phase 1, co-ordination and delivery

GMH - energy audit, then get guotes for necessary work
